

Connectors

A list of all pre-built connectors for Aspire available from Search Technologies

blocked URL **Premium** are licensed separately from Enterprise and Community distributions.

blocked URL **Aspire Enterprise bundled** are included in the Enterprise distribution.

(No icon) **Aspire Community bundled** are included in Community and Enterprise distributions.

blocked URL **Open source**.

In Aspire 3.0, most connectors are built using the new **NoSQL Connector Framework**. However those marked **LEGACY** are built upon the old framework from Aspire 2.0. Legacy versions of all connectors using the previous connector framework are still available in Aspire 3.0 (for backwards compatibility).

Legacy connectors need to be loaded manually via the custom button in order to be used. At this point there is known issue whereby the legacy icon may appear next to a non-legacy connector that is unavailable.

On this page:

- blocked URL Premium are licensed separately from Enterprise and Community distributions.
- blocked URL Aspire Enterprise bundled are included in the Enterprise distribution.
- (No icon) Aspire Community bundled are included in Community and Enterprise distributions.
- blocked URL Open source.
- In Aspire 3.0, most connectors are built using the new NoSQL Connector Framework. However those marked are built upon the old framework from Aspire 2.0. Legacy versions of all connectors using the previous connector framework are still available in Aspire 3.0 (for backwards compatibility).

Connectors

File Systems

- File System
- blocked URL CIFS
- blocked URL Amazon S3
- blocked URL Box.com

Relational Databases

- RDB with Incremental via Table
- blocked URL RDB with Incremental via Snapshots

Content Management Systems

- blocked URL Documentum
- blocked URL SharePoint 2010
- blocked URL SharePoint 2013
- blocked URL SharePoint Online
- blocked URL Lotus Notes

Collaboration

- blocked URL Atlassian Confluence
- blocked URL eRoom
- blocked URL IBM Connections

- [blocked URL Jira](#)
- [blocked URL JIVE](#)
- [blocked URL SocialCast](#)
- [blocked URL TeamForge](#)
- [blocked URL Salesforce](#)
- [blocked URL Service Now](#)
- [blocked URL Subversion](#)

CRM

- [blocked URL RightNow](#)

Website (HTTP)

- [blocked URLblocked URL Heritrix](#)

Staging Repository

- [blocked URL Staging Repository - File System](#)

Others

- [blocked URL Jira Issues](#)
- [FTP](#)
- [Feed One](#)
- [RSS](#)

Standalone Testing of Connectors

See [Connector Scanner Stage Test Harness](#) for details about testing scanners outside of Aspire.

NoSQL Connector Framework

See the [NoSQL Connector Framework Overview](#) for details about the framework used to build the scanners.
