

Jive For Developers

Jive Scanner

Detailed information on configuring the JIVE Source. Also includes a discussion of all of the metadata produced, with an example.

Jive Fetch URL

Detailed information on the JIVE FetchUrl java component which opens an InputStream to the given URL which can be read by down-stream pipeline stages. Only needed by programmers who might need to integrate the JIVE Scanner in novel ways not supported by the standard framework and routing table.

Jive Group Expansion

Detailed information on configuring the JIVE group expansion component. This is bundled with the JIVE connector, so this information on the component is only needed by programmers who might have custom JIVE integration needs.

Jive Security Mapper Plugin

Detailed information on configuring the JIVE Application Bundle. Also includes a discussion of all of the metadata produced by the Application Bundle, with an example.
