

# Components

If you're creating a new component, see [Creating Components](#), but check here first as somebody else may have done what you want to.

You can find the **Javadocs** for the latest Aspire code at <https://wiki.searchtechnologies.com/javadoc/aspire-latest/> Other versions can be found via <https://wiki.searchtechnologies.com/javadoc/>

## Pre-Built Components

## Document Hierarchy Components

## OCR Components

Component descriptions that:

- show the [blocked URL](#) icon are **Premium**, meaning they do not come in the Enterprise distribution and are licensed separately.
- do not show either icon are **Aspire Basic bundled**, meaning they come in the Basic distribution.
