Services & Workflow

Search Technologies provides enterprise search & big data expertise, consulting & integration services, and applications. Applications contain configurable components so you can create solutions to acquire data from your content repositories.

****Aspire 3.2 Connector and Publisher details***

Aspire Basic bundled contains all former Community and Enterprise connectors and *all* publishers. Aspire Basic is restricted (via licensing) to systems that contain less than 1 million documents.

Aspire Enterprise contains all connectors included in Aspire Basic, but can scale for extremely large amounts of content (unlimited number of documents).
