

Exception Error Resolution List

Common Exceptions and their Resolution

AspireException

- [AspireException: Unable to locate bundle for component factory](#)
- [AspireException: Error occurred while executing the groovy script](#)

java.lang.Exception

- [Java.lang.ClassCastException: <ClassX> cannot be cast to <ClassY>](#)
- [java.lang.LinkageError: loader constraint violation](#)

Memory Errors

- [Using JMX Console to investigate memory errors](#)
- [Aspire and Permgen memory issues](#)

Parsing Errors

- [org.xml.sax.SAXParseException: Content is not allowed in prolog.](#)
 - This error is caused by the presence of a byte-order mark (BOM) at the start of your XML file. You can see the BOM using "od -c <filename>". You can remove the BOM simply by copying and pasting the entire file contents to a new file in a text editor since the BOM does not get copied to the clipboard.
