

# SharePoint Online Connector For Developers

## SharePoint Online App Bundle

Detailed information on configuring the SharePoint Online App Bundle. Also includes a discussion of all of the metadata produced by the App Bundle, with an example.

## SharePoint Online Scanner

Detailed information on the SharePoint Online java component which scans for SharePoint Online content. Only needed by programmers who might need to integrate the SharePoint Online scanner in novel ways not supported by the standard framework and routing table.

## SharePoint Online Group Expansion Service

Detailed information on configuring the SharePoint Online group expansion component. This is bundled with the SharePoint Online connector, so this information on the component is only needed by programmers who might have custom SharePoint Online integration needs.
