

Connectors

A list of all pre-built connectors for Aspire available from Search Technologies

Legacy connectors need to be loaded manually via the **custom** button in order to be used. *There is known issue whereby the legacy icon may appear next to a non-legacy connector that is unavailable.*

blocked URL Premium are licensed separately from Enterprise and Community distributions.

blocked URL Aspire Enterprise bundled are included in the Enterprise distribution.

(No icon) **Aspire Community bundled** are included in Community and Enterprise distributions.

blocked URL Open source.

In Aspire 3.1, most connectors are built using the new **NoSQL Connector Framework**. However those marked **LEGACY** are built upon the old framework from Aspire 2.0. Legacy versions of all connectors using the previous connector framework are still available in Aspire 3.1 (for backwards compatibility).

Connectors

File Systems

- **blocked URL File System**
- **blocked URL CIFS**
- **blocked URL Amazon S3**
- **blocked URL Box.com**
- **blocked URL HDFS**
