

# Connectors

A list of all pre-built connectors for Aspire available from Acceleware Search & Content Analytics (formerly Search Technologies)

Legacy connectors need to be loaded manually via the **custom** button in order to be used. *There is a known issue whereby the legacy icon may appear next to a non-legacy connector that is unavailable.*

## Connector Info

**blocked URL Premium** are licensed separately from Enterprise and Basic distributions.

(No icon) **Aspire Basic bundled** are included in Basic and Enterprise distributions.

**blocked URL Open source.** In Aspire 3.2, most connectors are built using the **NoSQL Connector Framework**. Any marked **LEGACY** are built on the Aspire 2.0. legacy framework and are still available in Aspire 3.2 (for backwards compatibility).

## Connectors

### File Systems
