StageR Connector Prerequisites

Before installing the STageR connector, make sure that StageR is up and running.

Version of StageR required

The Aspire STageR connector was created and tested using Version 1.0. For more details on the StageR, see here.

Certificate Requirements

If the StageR is using *https*, the appropriate certificates will need to have been installed in Aspire.

Windows or Linux

The StageR connector will run on either Windows or Linux.
