

Lotus Notes For Developers

Lotus Notes Source

Detailed information on configuring the Lotus Notes Source. Also includes a discussion of all of the metadata produced by the Source, with an example.

Lotus Notes Fetch URL

Detailed information on the Lotus Notes FetchUrl java component which opens an InputStream to the given URL which can be read by down-stream pipeline stages. Only needed by programmers who might need to integrate the Lotus Notes scanner in novel ways not supported by the standard framework and routing table.

Lotus Notes Group Expansion

Detailed information on configuring the Lotus Notes group expansion component. This is bundled with the Lotus Notes connector, so this information on the component is only needed by programmers who might have custom Lotus Notes integration needs.

If any other Component Add after all these sections
