

# Heritrix For Developers

This section is for advanced topics and information for developers who wish to work with the Heritrix App Bundle or the Heritrix scanner.

## Heritrix Application Bundle

Detailed information on configuring the Heritrix App Bundle. Also includes a discussion of all of the metadata produced by the App Bundle, with an example.

## Heritrix Scanner

Detailed information on the Heritrix java component which scans for web content. Only needed by developers who need to integrate the Heritrix scanner in ways not supported by the standard framework and routing table.
