# Connectors

A list of all prebuilt connectors for Aspire available from Accen ture Search & Content Analytics (formerly Search Technologies)

Legacy connectors need to be loaded manually via the **custom** button in order to be used. *There is a known issue whereby the legacy icon may appear next to a non-legacy connector that is unavailable.*

**Connector Info**

**Premium** are licensed separately from Enterprise and Basic distributions.

*(No icon)* **Aspire Basic bundle** are included in Basic and Enterprise distributions.

Open source. In Aspire 4.0, most connectors are built using the NoSQL Connector Framework. Any marked LEGACY are built on the Aspire 2.0. legacy framework and are still available in Aspire 4.0 (for backwards compatiblity).

## Connectors

### File Systems

- File System
- CIFS THIS ITEM IS BEING DEPRECATED.
- SMB
- Amazon S3
- Box.com
- HDFS
- OneDrive
