

Connectors

A list of all pre-built connectors for Aspire available from Acce
nture Search & Content Analytics (formerly Search
Technologies)

Legacy connectors need to be loaded manually via the **custom**
button in order to be used. *There is a known issue whereby
the legacy icon may appear next to a non-legacy connector
that is unavailable.*

Connector Info

Premium are licensed separately from Enterprise and
Basic distributions.

(No icon) **Aspire Basic bundled** are included in Basic and
Enterprise distributions.

Open source. In Aspire 3.3, most connectors are built
using the **NoSQL Connector Framework**. Any marked
LEGACY are built on the Aspire 2.0. legacy framework and
are still available in Aspire 3.3 (for backwards compatibility).

Connectors

File Systems

- File System
-  CIFS
-  SMB
-  Amazon S3
