AEM Connector Prerequisites

Version of AEM Required

The Aspire AEM connector was created and tested using **version 6.4**

Before installing the AEM connector, make sure that:

- AEM server is up and running

User Account Requirements

In order to access AEM, a user account with sufficient read privileges to access the content to crawl must be supplied.

Server requirements

The JSON API must be enabled in the AEM server for the connector to work.
