

Getting Started

1. To get started with Aspire you must first obtain a license to use it. Check [Aspire Registration and Licensing](#)
2. Checkout the prerequisites and versions of dependencies needed at [Prerequisites](#) and [Supported Versions](#)
3. Choose your deployment mechanism:
 - a. [Quickstart Guide with Docker Desktop](#)
 - b. [How to Set Up On-premises](#)
 - c. [Kubernetes Deployments](#)
4. If production deployment is being considered, check out
 - a. [Enable HTTPS](#)
 - b. [Production Minimum Recommended Settings](#)
