

Elasticsearch Publisher - Features

The Elasticsearch Publisher will post documents to Elasticsearch index through the URL: `http://<elasticsearch-hostname>:9200/_bulk`, as described by Elasticsearch in the Bulk API.

Features

Some features of the Elasticsearch Publisher include:

- Customization of the feed for Elasticsearch by editing the Groovy script.
- Connector independent.
- Runs from any machine with access to Elasticsearch.

Windows or Linux

The Elasticsearch Publisher runs on either Windows or Linux.
