

# UI - Azure Identity Connector Configuration

The Azure Identity Connector can be configured by using the Aspire Admin UI. The following pages describe the necessary objects to be created:

## Credentials

Configure the Credentials to be used by the Connection object when using the Aspire Admin UI.

## Connection

Configure the Connection to be used by the Azure Identity Connector when using the Aspire Admin UI.

## Connector

Configure the Azure Identity Connector properties when using the Aspire Admin UI.

## Seed

Configure the Seed for the different Azure Identity Connectors when using the Aspire Admin UI.
